

What's New in TIS-Web® 4.9

VDO are delighted to inform you that as part of a program of continual improvements, the latest version of TIS-Web®, Version 4.9, will be available from Monday 08th January 2018.

Once again this upgrade is free of charge and will be installed automatically when you first log into your TIS-Web account after 08th January 2018.

The new and improved features include the following:

1. Driver Availability via WR-DLD II data

The Driver Availability functionality in TIS-Web DMM can now display the VDO Counter data received from the WR-DLD II unit when used with TIS-Web Motion for location information.

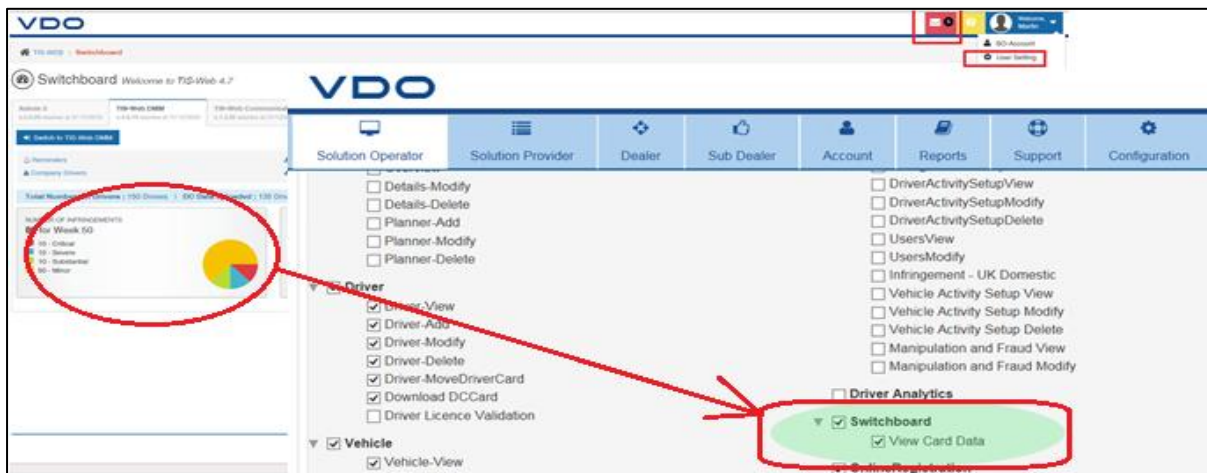

If the VDO Counter data is not present on the DTCO, then the availability data is still displayed but based on the calculated values from the location data received in TIS-Web Motion.

Driver name	Source	Latest Data	0 → 1	1 → 0	0	24h 0 → 1	0 → 24h 1	1	11	# 0 → 1	# 1 → 0	
SANTAMARIA FREIRE, ANGEL						10:00		56:00		2	3

2. Switchboard Summary Cards

The data summary cards on the Switchboard screen can now be enabled or disabled based on the privileged assigned to the logged in user.

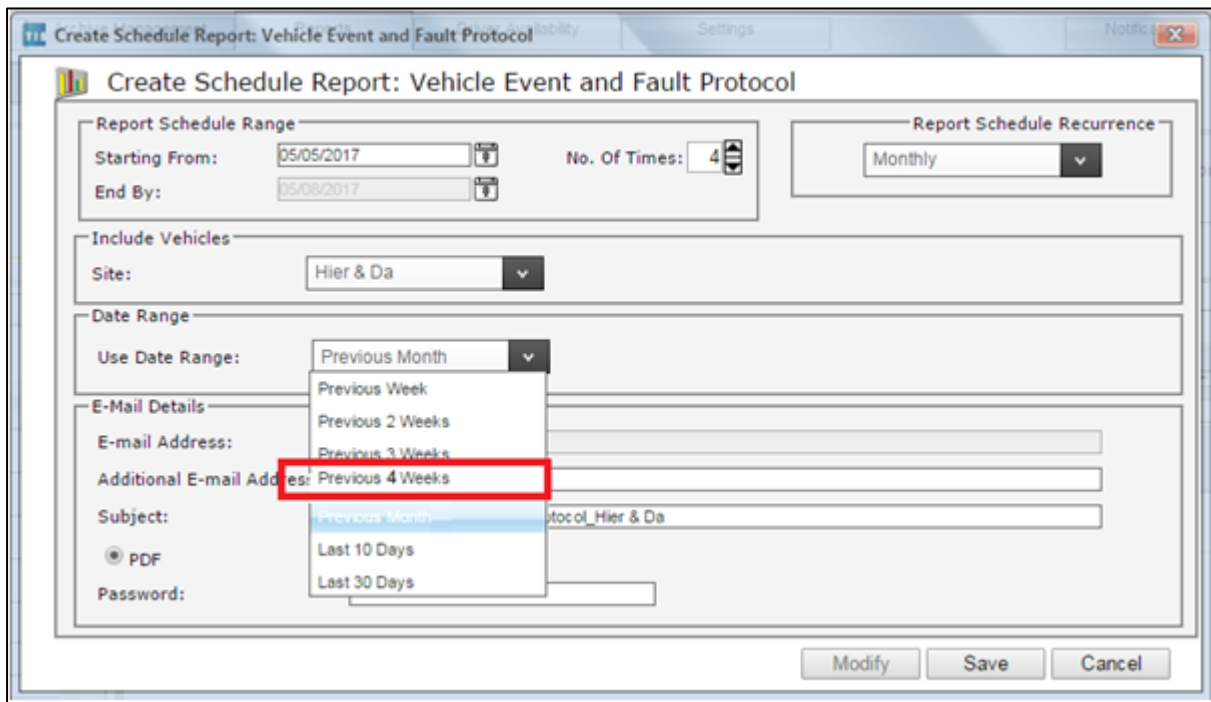

This allows the customer to control which User is allowed view the information displayed in the Summary cards.

3. More Scheduled Reports

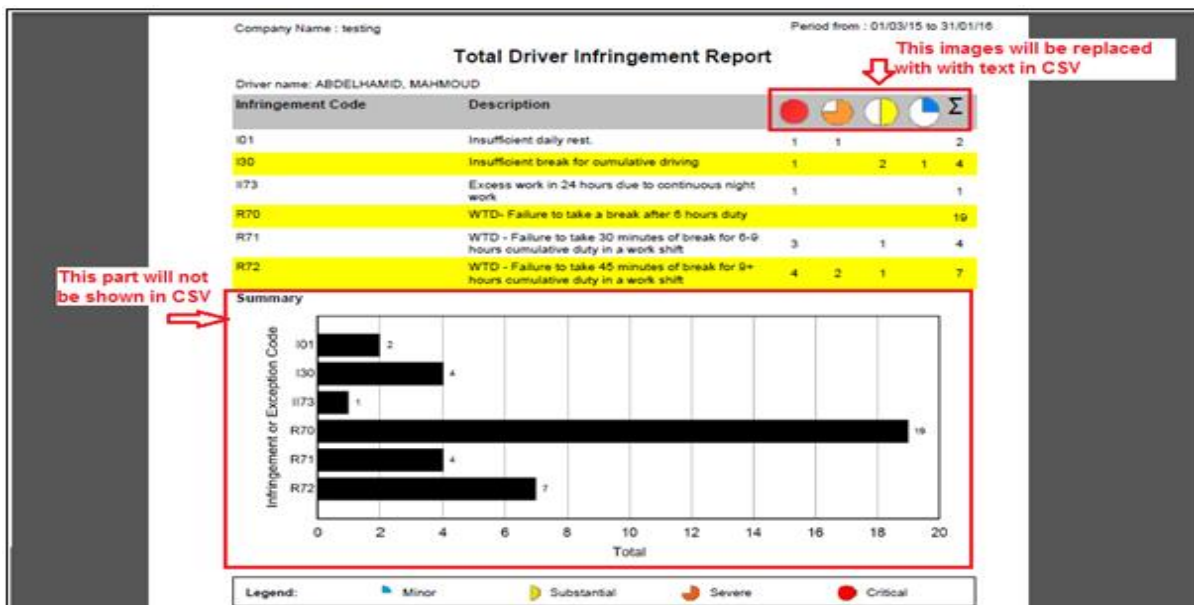

The following six reports can now be scheduled for email delivery and all schedules can now also be set for the previous 4 weeks in the "Use Date Range" field:

- Daily Driver Activity Protocol
- Driver Work Days
- Total Driver Infringement
- Driver Infringement Shift report
- Driving without Start Nation
- Vehicle Odometer Summary

4. Total Driver Infringement in CSV format

The Total Driver Infringement report can now be exported in the CSV format.

5. Reminders Report – specific reminder selection

A new field in the Reminders Report called *Selected Reminders* allows the user to select the specific type of reminders from the following selection:

- Driver Card Download
- Vehicle Unit Download
- Driver Card Expiry
- Vehicle Unit Calibration
