

Case Study

Product: VDO TIS-Web® and TIS-Web® Fleet App

Company: Snelgrove Trucks

Company Profile

Haulage contractor based in Somerset.

Fleet Size

15 HGV's

Business Issue

A requirement to make downloading quicker and easier with one software solution rather than several different products operating separately.

Continental Solution

VDO TIS-Web® and TIS-Web® Fleet App

Key Benefits

Simpler operating system that allows efficient downloading of both Driver Card and Vehicle Unit data remotely and safer methods of monitoring vehicles with the additional benefit of being able to communicate to the drivers and complete the daily vehicle checks electronically.

Customer Comment

"We were really impressed with the VDO product portfolio and the fact that we could go to one manufacturer that could supply the equipment to meet any of our requirements. Not only do they make the tachographs but they give us a trusted range of data management solutions at the right price", Dave Casling, Transport Office Manager.
