

Case Study

Product: VDO Digital Tachograph & Remote Data Download Device (DLD®)

Company: Stan Robinson Stafford Ltd

Company Profile

Stan Robinson is a national logistics company operating from four sites around the UK.

Fleet Size

160 Rigid and Artic heavy goods vehicles.

Business Issue

To increase fleet efficiency.

Continental Solution

VDO Digital Tachograph 2.1 Active and Remote Data Downloading (DLD®)

Key Benefits

The ability to download Tachograph and Driver Card Data anywhere in the UK, making significant time savings.

Customer Comment

“The improvements we have noticed on the fleet have been amazing: we now download our trucks anywhere in the UK with the Fleet Manager still remaining in their office. There is no vehicle downtime and no need to even see the vehicle as with touch of the button technology the data is downloaded. It makes life far easier for both the office and the driver.

Keeping our fleet efficient and legal is paramount in our business and with VDO products we feel we are reaping the benefits by using these products. The VDO Digital Tachograph also saves us time with the 1 minute rule legislation being used to our advantage so that we now have an additional 45 minutes driving per vehicle”.
