

## Disabling the download of the Special Data file (S File) on VDO Download keys

### 1. Downloadkey I (with a red dot on the bottom of the key).

- a) Connect the Downloadkey to one of the USB ports on the PC.
- b) Start the Windows Explorer and open the **DOWNLOADKEY** drive and double click on **Start.html**.
- c) Click on the **Run** button on the screen below:

- d) Click on the **No** button to the Java security message as shown below:

- e) Once you get the screen below, select the **Default Configuration** tab and un-tick the selection for **Siemens VDO Download** as shown below and press the **Apply** button to confirm the changes.

The screenshot shows a web-based configuration interface with the following elements:

- Navigation tabs: Default configuration (selected), Vehicle configuration, Calendar, Overview, Log
- Language configuration:
  - Language: English
  - File name format: Rest of Europe
- Data blocks:
  - Complete Mass Memory
  - Selection
    - Overview data
    - Detailed Speed
    - Events and Faults
    - Technical Data
    - Activities
    - Card Download
    - Siemens VDO Download
- Period:
  - Since last download
  - From: [ ] to [ ]
  - Last: [ ] days
  - Calendar button
- Apply button

## 2. Downloadkey II and all DLK PRO keys

- a) Connect the download key (DownloadKeyII, DLK Pro Download Key, DLK Pro TIS-Compact or DLK Pro Inspection Key) to the computer by inserting the key into a free USB 2.0 port on the computer.
- b) The Autostarter function automatically starts the KeyTools configuration software.  
If this does not start automatically, start Windows Explorer and open the **KEYTOOLS** drive and double click on '**Start.exe**'.
- c) The 'KeyTools' Calendar Module window will then be displayed.  
Select the **Configuration Module** button and make sure **Selection** is selected in the drop down box and that the rest of the settings are as in the screen below: (**Special Data should NOT be ticked**).
